FRIDAY, JAN. 17, 1890.

We regret to hear of the muddle the School Board for No. 3 district have got themselves into by the neglect of a couple of the newly elected trustees to make the necessary declaration of office within the prescribed time laid down by Ordinance, which distinctly says must be done within eight days, as failing to do so will be looked upon as a refusal to act with its attendant penalties. We understand the question will be laid before the Lieut-Governor to deal with, who no doubt will void the election so far as these gentlemen are concerned. In fact we cannot see how anything else can be done for the safety of the legality of the Board. Both these gentlemen are old and valuable members of this same Board, and must have known better, and are certainly to blame for their carelessness in letting the proper time elapse. However, judging from the recent contest, their re-election will be a foregone conclusion. The Ordinance also says that five members shall constitute a Board for schools within town limits. In that event, what about our East End schools? Have they complied with the law in that direction? We think not. Both these matters should be attended to at once.

Now that it has been demonstrated by actual accomplishment that the speed of ocean vessels can be increased to such an extent as to considerably lessen the time between New York and Queenston, renewed efforts are being put forth to still further increase the speed, and if the City of Paris is to maintain her proud position as the fastest passenger steamer afloat she will have to do some tall work. No less than six fast steamers are in course of construction all of which are the finest shipbuilders can build, and these are being built with the chief end in view of making the ocean trip in as short a time as possible. The Hamburg-American line will have a magnificent ship running next May. She is now being built by the same firm that built the Umbria and the Etna, and will be called the Normania. Though a little smaller than the City of Paris, the new boat will have a 59 feet beam, and 38 feet depth of hold with an indicated 16,000 horse power, and another new vessel will be the Venetia, but this one cannot be ready before 1892. Four other steamers have been contracted for. They are to be built for speed and comfort combined, and will probably be larger than any of the ocean ships now in use.

Speaking of the escape of convicts from the Kingston Penitentiary. The Ottawa Free Press thinks that institution threatens to become troublesome. Well we scarcely expect the occupants of a penitentiary to be as quiet and well disposed as those of a monastery, but it can be said that the more escapes there are the less chances there will be of trouble.

During the past ten years the wealth of the United States has increased \$18,000,000,000, or 42 per cent. This has been accomplished under a protective tariff.

"One half the world does not know how the other lives," and on general principles it is none of their business. But it may be interesting to know that in Vancouver there are 500 people who live in floating scows with small cabins built thereon, and that out in California there are a family living in a hollow tree.

It seems that there has been a systematic defalcation for years in the administration of the public affairs of Prince Edward Island, and yet the sum in default is only a couple of thousand dollars. One does not know which must to admire—the laxity of the auditors in not discovering, the defalcation or the forbearance of the official in not taking more.

BATTLEFORD.

W. J. Barker is in from Onion Lake. A fine ball was received by the amateur football Club last week.

Mr. Balfour the new school teacher got in by the stage on Monday.

W. Peterson has gone to Turtle Lake on a trading expedition for Mahaffy and Cluskill.

The Prince brothers, having ground all the wheat attainable in the district, have closed their mill.

The epidemic has got a good hold in Industrial school. Mr. Ashby is laid up and a number of the boys and girls.

Mr. Clink did not go east last week, owing to his not having his business in shape, but he is booked for going out to-day. He has subdivided eighty acres of land west of town plot into lots, and is going east to put them on the market. He has already effected some sales amongst the townspeople.

Charles Bremner, of Bresaylor, about the seizure of whose furs so much has been said since the rebellion, has declined the offer of settlement made by the Government and is about to bring action in the courts to recover the value of his property.

GENERAL NEWS.

Wash., Jan. 5.—The over-land routes are all delayed in eastern Canada by snow storms. The N. P. is about eighteen hours late. The route is the coldest known here for years.

Cal., Jan. 5.—The fall of the Sierra Nevada mountains has delayed the Central Pacific rail-roads. Reports received here is that it is sixteen feet on the summit, and twelve feet at the foot. The road has been kept open by the use of immense quantities of dynamite.

Cal., Jan. 4.—Latest advices from N. F. indicate that as yet no serious difficulties have been unable to be overcome. The terrible devastations of diphtheria in that colony during the past few months. In that time there were within the city limits 2,664 cases and 401 deaths, and outside the city limits 105 cases and 29 deaths. There were over thirty cases last week, and only one death.

Cal., Jan. 6.—The New Year's festival at William to Prince Bismarck has aroused considerable discussion. It is called the aggrandizement of the German Empire. The fact that strikes critics is that since the death of William the Second the Emperor has more and more as the main object of government, and the Ministers have more and more into the background the legislative bodies and even the Reichstag. The Emperor has more and more as the main object of government, and the Ministers have more and more into the background the legislative bodies and even the Reichstag.

Cal., Jan. 3.—A prominent member of parliament says Sir Edward Watkin is going ahead with his tunnel under the Channel. He is convinced that when the tunnel is complete it will be allowed to do what he likes under the Channel. It will never do to the £30,000 which have already been put in the big hole near Dover. The tunnel is declared they will stand by it. He will need all the help he can get before he reaches the French coast.

Cal., Jan. 1.—Last Thursday, a boy, of the Industrial School, was the victim of a painful accident. He was in a well cutting out the bottom of a bucket. On the top of one of the buckets was a piece of ice about fifteen inches in weight, and just as it had reached the surface, it slipped and fell, striking Mr. Gately on the back of the head. He was knocked senseless, and on recovery complained of great pains in his head and muscle of his body. He was recovering from the immediate effects of the blow, but still suffers much from the nervous shock.

Cal., Jan. 5.—Mr. F. Donaghue, a great amateur skater, has accomplished the feat of breaking the world's record at the Palace rink, Minneapolis. He covered the distance in 17:45. His professional time was 17:45. Donaghue was in fine form and announced his intention of breaking the record. There had been question about the track, many believed it was short. The starter was going to make an honest effort, he said, and he wanted to be sure and have the record correct.

Cal., Jan. 6.—The novel on which O'Brien employed his time in the last week was published. A friend of O'Brien, who is no bad judge in literature, has read several chapters of the novel, and says he believes it will be a sensation by revealing remarkable and hitherto unsuspected powers on O'Brien's part and by shedding light on the inner soul of the Irish problem. Though not a political novel in any sense of the word, it is likely to do much for the Irish cause. The report that Mr. O'Brien had parted with the copyright is incorrect. He has received overtures from several publishers but has not yet made up his mind to anyone.

Cal., Jan. 4.—The country from which most startling rumours are launched is now Spain. Two or three new rumours are formed there daily, and one believes correspondents, and revolutionaries are kept on tap to be produced in a new sensation is demanded. The story is that the late fire, at the house, supposedly due to the mismanagement of electrical lighting apparatus, was a malicious plot to create a sensation, during which the Queen Regent and her family were to be got rid of by personal endeavor if the fire and the police proved insufficient.

Cal., Jan. 5.—The funeral of the

Coughs, Colds, Croup.

Allen's Lung Balsam was introduced to the public after its merits for the positive cure of such diseases had been fully tested. It excites expectation and causes the Lungs to throw off the phlegm or mucus; changes the secretions and purifies the blood; heals the inflamed parts; gives strength to the digestive organs; brings the liver to its proper action, and imparts strength to the whole system. Such is the immediate and satisfactory effect that it is warranted to break up the most distressing cough in a few hours' time, if not of too long standing. It contains no opium in any form and is warranted to be perfectly harmless to the most delicate child. There is no real necessity for so many deaths by consumption when Allen's Lung Balsam will prevent it if only taken in time. For Consumption, and all diseases that lead to it, such as Coughs, neglected Colds, Bronchitis, Asthma and all diseases of the Lungs. ALLEN'S LUNG BALSAM is the Great Modern Remedy. For Croup and Whooping Cough it is almost a specific. It is an old standard remedy, and sold universally at 50 cents and \$1.00 per bottle. The 25-cent bottles are put out to answer the constant call for a Good and Low-Priced Cough Cure. If you have not tried the Balsam, call for a 25-cent bottle to test it.

late Hon. Dr. Blanchet, late collector of customs at this port, occurred at Levis to-day and was well attended. Many prominent politicians of both political parties were present.

WINNIPEG, Jan. 6.—On Saturday evening those associated with T. H. Preston, during his years of management of the Sun, called at his residence on James St. east to give expression in a tangible form to the severance of their relations. Mr. R. L. Richardson, who has been continuously associated with Mr. Preston for many years, and in various ventures, read an address, which was signed by members of the Sun staff, while Mr. R. Campbell, foreman of the newsroom, made the presentation, which took the form of a handsome marble clock.

BARRIE, Jan. 4.—McCarthy spoke here last evening before his constituents on his action on the Jesuit's question. He said he had come to address them feeling they were entitled to hear from him, and to ask their counsel before going to parliament, because he wanted his constituents to endorse the action he had taken. He gave a brief account of the Jesuits and the Jesuit's Estates Act. He explained the position of the thirteen members and how they had been outvoted. He touched on the dual language question in the Northwest, and wanted his constituents to show their approval, before going to parliament, of his intention to introduce a measure for the abolition of the dual language system in the Northwest.

New York, Jan. 5.—Letters received by steamship Alliance from Brazil, state that rumors of secret executions by the Government continue to be circulated. The police of Rio Janeiro are armed with Winchester rifles instead of the small arms formerly carried. It is reported that the Provisional Government has offered to appoint Baron Ladario as superintendent of naval construction, when he recovers from the wound sustained while defending the empire. Gen. Fonseca is receiving much adulation from some of the army officers. A movement is on foot to purchase the horse he rode in the revolution, and keep the animal as a memento of that occasion. The man who attempted to shoot the Emperor on July 15th, was acquitted by a jury last week. For the first time in half a century Dum Pedro's birthday, December 2nd, was not observed as a holiday.

New York, Jan. 1.—Fire on the steamship La Champagne early this morning, while lying at the dock created some consternation among the passengers, but was extinguished with \$500 loss. The fire occurred only a few minutes before the advertised time for starting and the steamship was unable to start. It is probable the damage will be repaired so that she can sail before night.

Allen's Lung Balsam was introduced to the public after its merits for the positive cure of such diseases had been fully tested. It excites expectation and causes the Lungs to throw off the phlegm or mucus; changes the secretions and purifies the blood; heals the inflamed parts; gives strength to the digestive organs; brings the liver to its proper action, and imparts strength to the whole system. Such is the immediate and satisfactory effect that it is warranted to break up the most distressing cough in a few hours' time, if not of too long standing. It contains no opium in any form and is warranted to be perfectly harmless to the most delicate child. There is no real necessity for so many deaths by consumption when Allen's Lung Balsam will prevent it if only taken in time. For Consumption, and all diseases that lead to it, such as Coughs, neglected Colds, Bronchitis, Asthma and all diseases of the Lungs. ALLEN'S LUNG BALSAM is the Great Modern Remedy. For Croup and Whooping Cough it is almost a specific. It is an old standard remedy, and sold universally at 50 cents and \$1.00 per bottle. The 25-cent bottles are put out to answer the constant call for a Good and Low-Priced Cough Cure. If you have not tried the Balsam, call for a 25-cent bottle to test it.
